Descrizione fisica	1 online resource (x, 270 pages) : digital, PDF file(s)
Collana	Cambridge studies in philosophy
Disciplina	128/.2
Soggetti	Philosophy of mind Mind and body Cognition Externalism (Philosophy of mind)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 05 Oct 2015).
Nota di bibliografia	Includes bibliographical references (p. 258-266) and index.
Nota di contenuto	Preliminaries; Contents; Preface; 1 Introduction: 'A picture held us captive'; 2 Introduction to Part I: 'Don't work hard,work smart'; 3 Environmentalism and what it is not; 4 Environmentalism and evolution; 5 Perception; 6 Memory; 7 Thought; 8 Language; 9 Introduction to Part II: the need for and the place of a theory of representation; 10 Two theories of representation; 11 Environmentalism and teleological semantics; References; Index
Sommario/riassunto	In this book, Mark Rowlands challenges the Cartesian view of the mind as a self-contained monadic entity, and offers in its place a radical externalist or environmentalist model of cognitive processes. Cognition is not something done exclusively in the head, but fundamentally

something done in the world. Drawing on both evolutionary theory and a detailed examination of the processes involved in perception, memory, thought and language use, Rowlands argues that cognition is, in part, a process whereby creatures manipulate and exploit relevant objects in their environment. It is not simply an internal process of information processing; equally significantly, it is an external process of information processing. This innovative book provides a foundation for an unorthodox but increasingly popular view of the nature of cognition.
