Sommario/riassunto	The United States entered the 21st century as the world's sole superpower. Our diplomatic strength, military might, financial resources, and technological innovation were, and continue to be, the envy of the world. However, in the crucial area of education, the U.S. lags behind many other developed countries. Though the U.S. spends

more per student than almost any other country, international exams have demonstrated that we consistently perform well behind countries such as South Korea, China, Japan, and Finland in the areas of reading and
