Sommario/riassunto	This book offers an examination of the role of emancipation in the study and practice of security, focusing on the issue of environmental change. The end of the Cold War created a context in which traditional approaches to security could be systematically questioned. This period also saw a concerted attempt in IR to argue that environmental change constituted a threat to security. This book argues that such a notion is problematic as it suggests that a universal definition of security is possible, which prevents a recognition of security as a site of contestation, in which a ra
