

1. Record Nr.	UNINA9910778943203321
Titolo	Chimpanzees in biomedical and behavioral research [[electronic resource]] : assessing the necessity // Committee on the Use of Chimpanzees in Biomedical and Behavioral Research ; Board on Health Sciences Policy, Institute of Medicine ; Board on Life Sciences, Division on Earth and Life Studies ; Bruce M. Altevogt ... [et al.], editors
Pubbl/distr/stampa	Washington, D.C., : National Academies Press, 2011
ISBN	0-309-22042-4 1-280-12332-X 9786613527189 0-309-22040-8
Descrizione fisica	1 online resource (201 p.)
Altri autori (Persone)	AltevogtBruce M
Disciplina	616.02738
Soggetti	Animal models in research Chimpanzees
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	""Front Matter""; ""Reviewers""; ""Contents""; ""Summary""; ""Appendix A: References""; ""Appendix B: Commissioned Paper: Comparison of Immunity to Pathogens in Humans, Chimpanzees, and Macaques""; ""Appendix C: Information-Gathering Agendas""; ""Appendix D: Committee Biographies""
Sommario/riassunto	"For many years, experiments using chimpanzees have been instrumental in advancing scientific knowledge and have led to new medicines to prevent life-threatening and debilitating diseases. However, recent advances in alternate research tools have rendered chimpanzees largely unnecessary as research subjects. The Institute of Medicine, in collaboration with the National Research Council, conducted an in-depth analysis of the scientific necessity for chimpanzees in NIH-funded biomedical and behavioral research. The committee concludes that while the chimpanzee has been a valuable animal model in the past, most current biomedical research use of chimpanzees is not necessary, though noted that it is impossible to

predict whether research on emerging or new diseases may necessitate chimpanzees in the future"--Publisher description.
