Sommario/riassunto	St. Paul, the Natural Law, and Contemporary Legal Theory grew out of the Year of St. Paul (2008-2009) proclaimed by Pope Benedict XVI. It brings together the insights of Scripture scholars, theologians, philosophers and law professors on the ongoing importance of the natural law for legal theory and international relations. It argues that all human beings share certain common ethical standards based on the

moral law written into the human heart.
