Sommario/riassunto	In 1979, Dr. Allan Ronald, a specialist in infectious diseases from Canada, and Dr. Herbert Nsanze, head of medical microbiology at University of Nairobi, met through the World Health Organization. Ronald had just completed a successful project that cured a chancroid (genital ulcer) epidemic in Winnipeg and Nsanze asked him to come to Kenya to help with Kenya's "sexual diseases problem." That initial invitation led to a groundbreaking international scientific collaboration that would uncover critical pieces in the complex puzzle that became today's HIV/AIDS pandemic. In Piecing the Puzzle, journalist and documentary filmmaker Larry Krotz chronicles the fascinating history of the pioneering Kenyan, Canadian, Belgian, and American research team that uncovered HIV/AIDS in Kenya, their scientific breakthroughs and setbacks, and their exceptional thirty-year relationship that began a

Sommario/riassunto	An extraordinary outbreak of xenophobic violence in May 2008 shocked South Africa, but hostility toward newcomers has a long history. Democratization has channeled such discontent into a non-racial nationalism that specifically targets foreign Africans as a threat to prosperity. Finding suitable governmental and societal responses

requires a better understanding of the complex legacies of segregation that underpin current immigration policies and practices.

Unfortunately, conventional wisdoms of path dependency promote excessive fatalism and ignore how much South Africa is a typical settler state. A century ago, its policy makers shared innovative ideas with Australia and Canada, and these peers, which now openly wrestle with their own racist past, merit renewed attention. As unpalatable as the comparison might be to contemporary advocates of multiculturalism, rethinking restrictions in South Africa can also offer lessons for reconciling competing claims of indigeneity through multiple levels of representation and rights.
