Sommario/riassunto	"'Sex/Gender' presents a relatively new way to think about how biological difference can be produced over time in response to different environmental and social experiences. This book gives a clearly written explanation of the biological and cultural underpinnings of gender. Anne Fausto-Sterling provides an introduction to the biochemistry, neurobiology, and social construction of gender with expertise and humor in a style accessible to a wide variety of readers. In addition to the basics, 'Sex/Gender' ponders the moral, ethical, social and political

side to this inescapable subject"--
