Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. 1. History highlights ; Examination essentials -- pt. 2. Investigations -- pt. 3. Clinical settings.
Sommario/riassunto	Neurological disorders in children are common. Management and treatment depend on establishing the diagnosis, but the number of possible neurological investigations is very large, and uncritical investigations may be misleading and costly. This book gives practical guidance on how to target any specific condition with the minimum of tests.
