

1. Record Nr.	UNINA9910779187603321
Autore	Kassam Karim-Aly S. <1964->
Titolo	Biocultural diversity and Indigenous ways of knowing [[electronic resource]] : human ecology in the Arctic // Karim-Aly S. Kassam
Pubbl/distr/stampa	Calgary [Alta.], : University of Calgary Press, c2009
ISBN	1-280-12706-6 9786613530929 1-55238-492-6
Edizione	[1st ed.]
Descrizione fisica	1 online resource (291 p.)
Collana	Northern lights series, , 1701-0004 ; ; 12
Disciplina	304.20911/3
Soggetti	Human ecology - Arctic regions Indigenous peoples - Arctic regions Subsistence economy - Arctic regions Biodiversity conservation - Arctic regions Cultural pluralism - Arctic regions Traditional ecological knowledge - Arctic regions
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Co-published by Arctic Institute of North America.
Nota di bibliografia	Includes bibliographical references (p. 237-249) and index.
Nota di contenuto	Introduction -- Relations between culture and nature: a critical consideration -- Human ecology reconceptualized: a lens for relations between biological and cultural diversity -- "Man and his friends" -- An illustrative case of human ecology in Ulukhaktok, Northwest Territories, Canada -- "The weather is going under" -- Human ecology, phronesis, and climate change in Wainwright, Alaska, USA -- Mapping human ecology: a transformative act -- Implications of a human ecological outlook.
Sommario/riassunto	"At the dawn of the third millennium, dramatic challenges face human civilization everywhere. Relations between human beings and their environment are in peril, with mounting threats to both biological diversity of life on earth and cultural diversity of human communities. The peoples of the Circumpolar Arctic are at the forefront of these challenges and lead the way in seeking meaningful responses." "In Biocultural Diversity and Indigenous Ways of Knowing, author Karim-Aly Kassam positions the Arctic and sub-Arctic as a homeland rather

than simply a frontier for resource exploitation. Kassam aims to empirically and theoretically illustrate the synthesis between the cultural and biological, using human ecology as a conceptual and analytical lens. Drawing on research carried out in partnership with indigenous northern communities, three case studies illustrate that subsistence hunting and gathering are not relics of an earlier era, but rather remain essential to both cultural diversity and to human survival." "This book deals with contemporary issues such as climate change, indigenous knowledge, and the impact of natural resource extraction. It is a narrative of community-based research, in the service of the communities for the benefit of the communities. It provides resource-based industry, policy makers, and students with an alternative way of engaging indigenous communities and transforming our perspective on conservation of ecological and cultural diversity."--
