Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction -- Administration and authority structures in rural China from a historic perspective -- Direct village elections as a new element of administrative control and legitimization -- Previous studies on village elections and conceptual framework -- Three case studies -- Conclusions.
Sommario/riassunto	This monograph ties in the scholarly debate on Chinese village elections and their consequences for China's political system. By critically assessing the recent literature on village elections and drawing on qualitative fieldwork data gathered in six villages of two provinces and one urban district, it contributes to our understanding of the nexus between political participation and cadre accountability at the grassroots and highlights a number of factors ensuring the persistence of one-party rule in contemporary China.

2. Record Nr.	UNINA9910787086303321
Autore	Propst Evan J.

Slide Tracheoplasty (Single Stage); Index
Sommario/riassunto	Written by an international group of airway surgeons, this is an essential guide for residents and fellows in the fields of otolaryngology-head and neck surgery, general surgery, and thoracic surgery, as well as consultant surgeons in these specialties who are responsible for managing airway conditions, but infrequently perform open airway surgeries. It covers everything the trainee requires for

mastering open airway surgical procedures on a live animal and extrapolating these techniques to human patients.
