

1. Record Nr.	UNINA9910779340503321
Autore	Teegavarapu Ramesh S. V. <1970->
Titolo	Floods in a changing climate Extreme precipitation / / Ramesh S.V. Teegavarapu, Florida Atlantic University [[electronic resource]]
Pubbl/distr/stampa	Cambridge : , : Cambridge University Press, , 2012
ISBN	1-139-85401-1 1-107-23546-4 1-139-84588-8 1-139-84493-8 1-139-08844-0 1-139-84019-3 1-139-84257-9 1-283-81254-1 1-139-84138-6
Descrizione fisica	1 online resource (xvii, 269 pages) : digital, PDF file(s)
Collana	International hydrology series
Classificazione	SCI081000
Disciplina	551.48/9011
Soggetti	Precipitation (Meteorology) - Measurement Floods - Mathematical models Hydrologic models Climatic extremes Climatic changes
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 05 Oct 2015).
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	; Part I. Precipitation Processes and Measurement: ; 1. Precipitation and climate change; ; 2. Precipitation measurement; ; 3. Spatial analysis of precipitation data; ; Part II. Extreme Precipitation, Floods and Climate Change: ; 4. Extreme precipitation and floods; ; 5. Precipitation modeling and climate change; ; Part III. Precipitation Variability, Teleconnections and Trends: ; 6. Precipitation variability and teleconnections; ; 7. Global precipitation trends and variability; ; Part IV. Hydrologic Modeling and Design in a Changing Climate: ; 8. Hydrologic modeling and design; ; 9. Future perspectives; ; References; ; Index.
Sommario/riassunto	Measurement, analysis and modeling of extreme precipitation events

linked to floods is vital in understanding changing climate impacts and variability. This book provides methods for assessment of the trends in these events and their impacts. It also provides a basis to develop procedures and guidelines for climate-adaptive hydrologic engineering. Academic researchers in the fields of hydrology, climate change, meteorology, environmental policy and risk assessment, and professionals and policy-makers working in hazard mitigation, water resources engineering and climate adaptation will find this an invaluable resource. This volume is the first in a collection of four books on flood disaster management theory and practice within the context of anthropogenic climate change. The others are: Floods in a Changing Climate: Hydrological Modeling by P. P. Mujumdar and D. Nagesh Kumar, Floods in a Changing Climate: Inundation Modeling by Giuliano Di Baldassarre and Floods in a Changing Climate: Risk Management by Slodoban Simonovic.
