Sommario/riassunto	The rise of corporate groups in the last century dictates a shift in the income tax law: instead of treating each company as a separate taxpayer, the tax consolidation regime is increasingly common. Antony Ting presents the first comprehensive comparative study of eight consolidation regimes in Australia, France, Italy, Japan, the Netherlands, New Zealand, Spain and the USA. In the study, he critically

analyses and compares alternative policy options with respect to ten key structural elements. The study improves understanding of the design and implementation of consolidation regimes and sets the stage for the search for a model. It provides valuable information with respect to the best practices, as well as the pitfalls, in the design of a consolidation regime. The book is essential to countries contemplating the introduction of a new consolidation regime and offers important insights into the management of such a complex structure through careful policy-orientated choices.

Sommario/riassunto

""Fox News Watch"" host Eric Burns, who chronicled the social history of alcohol in *The Spirits of America* turns to tobacco in *The Smoke of the Gods*. Ranging from ancient times to the present day, *The Smoke of the Gods* is a lively history of tobacco, especially in the United States. Although tobacco use is controversial in the U.S. today, Burns reminds us that this was not always the case. For centuries tobacco was generally thought to have medicinal and even spiritual value. Most of the signers of the Declaration of Independence were tobacco users or growers, or bot
