Sommario/riassunto

This is the first collection of essays to be published on Durkheim's masterpiece *The elementary forms of religious life*. It represents the work of the most important international Durkheim scholars from the fields of anthropology, philosophy and sociology. The essays focus on key topics including: the method Durkheim adopted in his study, the role of ritual and belief in society, and the nature of contemporary religion. The contributors also explore cutting-edge debates about the notion of the soul and collective rituals.
