Soggetti	Economic development projects - Mozambique Forced migration - Zambezi River Valley Cahora Bassa Dam (Mozambique) History Zambezi River Valley Rural conditions
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction : Cahora Bassa in broader perspective -- The Zambezi River Valley in Mozambican history : an overview -- Harnessing the river : high modernism and building the dam, 1965/75 -- Displaced people : forced eviction and life in the protected villages, 1970/75 -- The Lower Zambezi : remaking nature, transforming the landscape, 1975/2007 -- Displaced energy -- Legacies.
Sommario/riassunto	Cahora Bassa Dam on the Zambezi River, built in the early 1970's during the final years of Portuguese rule, was the last major infrastructure project constructed in Africa during the turbulent era of decolonization. Engineers and hydrologists praised the dam for its technical complexity and the skills required to construct what was then the world's fifth-largest mega-dam. Portuguese colonial officials cited benefits they expected from the dam - from expansion of irrigated farming and European settlement, to improved transportation throughout the Zambezi River Valley, to reduced flooding in...
