Sommario/riassunto	The great paradox of science in the twentieth century is that the more we learn, the less we seem to know. In this volume, John Templeton and scientist Robert Herrmann address this paradox. Reviewing the latest findings in fields from particle physics to archaeology, from molecular biology to cosmology, the book leads the reader to see how mysterious the universe is, even to the very science that seeks to reduce it to a few simple principles. Far from concluding that religion and science are in opposition, the book shows how these two fields of inquiry are intimat
