Cover; Indice; Prefacio; Panorama general; Abreviaturas; PARTE I: CENTROAMERICA, PANAMA Y LA REPUBLICA DOMINICANA ANTES Y DURANTE LA CRISIS FINANCIERA MUNDIAL; 1 Vinculaciones externas e integracion economica desde 2009; 2 La crisis mundial de 2008-09: Impacto, respuestas de politica economica y papel del FMI; PARTE II: RETOS DE POLITICA: PANORAMA A PARTIR DE 2011; Reformas estructurales; 3 El desafio de estimular el crecimiento; Politica fiscal; 4 Un marco para evaluar el nivel de deuda publica; 5 La posicion fiscal: Perspectivas y opciones de ajuste
Supervision bancaria y de la politica monetaria; 6 Marcos de politica monetaria; 7 La dolarizacion oficial en El salvador como marco monetario alternativo; 8 La eficacia de la politica monetaria; 9 Supervision financiera y politicas macroprudenciales; Colaboradores; Indice analitico; A; B; C; D; E; F; G; H; I; L; M; N; P; R; S; T; U

Sommario/riassunto

América Central, Panamá y la República Dominicana sobrellevaron bien la crisis financiera mundial de 2008-09. El impacto fue en general menos severo y de menor duración que en episodios anteriores, el ajuste de la balanza de pagos fue ordenado, y la estabilidad del sistema financiero no se vio comprometida. Esta capacidad de resistencia puede atribuirse en gran medida al fortalecimiento de los marcos fiscales, a la gestión monetaria y a las reformas financieras introducidas en los años anteriores a la crisis internacional. Sin embargo, la región se enfrenta a considerables desafíos en el período venidero, entre ellos el de elevar el crecimiento a mediano plazo por encima de los niveles históricos y el de proteger la estabilidad macroeconómica y financiera. Este libro sostiene que la respuesta a estos desafíos deberá provenir de la demanda interna, considerando que se prevé un magro crecimiento de la demanda en los países que son socios comerciales. Por lo tanto, para estimular el crecimiento en la región será esencial adoptar reformas estructurales que generen mejoras sustanciales de la productividad. La reconstrucción del espacio fiscal y el logro de la sostenibilidad de la deuda dependerán de las medidas que se tomen para aumentar los ingresos fiscales y reorientar los gastos en función de las prioridades sociales y de inversión. En las economías no oficialmente dolarizadas también será fundamental fortalecer los marcos de política monetaria a fin de mantener la inflación en un bajo nivel y flexibilizar el tipo de

Nota di contenuto	Intro -- Title Page -- Copyright Page -- Brief Contents -- Contents -- Preface -- Acknowledgments -- Methodology Boxes -- Walk Through of Pedagogical Features -- Companion Website -- Section I The Neurobiology of Thinking -- Introduction to Section I The Neurobiology of Thinking -- COGNITIVE NEUROSCIENCE? OR "HUMAN NEUROSCIENCE"? OR "NEUROSCIENCE-WITH-DIRECT IMPLICATIONS-FOR-UNDERSTANDING-HUMAN-BEHAVIOR"? -- Chapter 1 Introduction and History -- KEY THEMES -- TIMELINE: NINETEENTH- AND TWENTIETH-CENTURY ORIGINS OF COGNITIVE NEUROSCIENCE -- A BRIEF (AND SELECTIVE) HISTORY -- Localization of function vs. mass action -- The first scientifically rigorous demonstrations of localization of function -- WHAT IS A BRAIN AND WHAT DOES IT DO? -- LOOKING AHEAD TO THE DEVELOPMENT OF COGNITIVE NEUROSCIENCE -- END-OF-CHAPTER QUESTIONS -- REFERENCES -- OTHER SOURCES USED -- FURTHER READING -- Chapter 2 The Brain -- KEY THEMES -- PEP TALK

-- GROSS ANATOMY -- The cerebral cortex -- THE NEURON -- Electrical and chemical properties of the neuron -- Neuroanatomical techniques exploit the physiology of the neuron -- OSCILLATORY FLUCTUATIONS IN THE MEMBRANE POTENTIAL -- Neurons are never truly "at rest" -- Synchronous oscillation -- COMPLICATED, AND COMPLEX -- END-OF-CHAPTER QUESTIONS -- REFERENCES -- OTHER SOURCES USED -- FURTHER READING -- Section II Sensation, Perception, Attention, and Action -- Introduction to Section II Sensation, Perception, Attention, and Action -- Chapter 3 Sensation and Perception of Visual Signals -- KEY THEMES -- THE DOMINANT SENSE IN PRIMATES -- ORGANIZATION OF THE VISUAL SYSTEM -- The visual field -- The retinotopic organization of primary visual cortex -- INFORMATION PROCESSING IN PRIMARY VISUAL CORTEX - BOTTOM UP FEATURE DETECTION -- The V1 neuron as feature detector -- Columns, hypercolumns, and pinwheels.

INFORMATION PROCESSING IN PRIMARY VISUAL CORTEX - INTERACTIVITY -- Feedforward and feedback projections of V1 -- Circularity? It can depend on your perspective -- The relation between visual processing and the brain's physiological state -- WHERE DOES SENSATION END? WHERE DOES PERCEPTION BEGIN? -- END-OF-CHAPTER QUESTIONS -- REFERENCES -- OTHER SOURCES USED -- FURTHER READING -- Chapter 4 Audition and Somatosensation -- KEY THEMES -- APOLOGIA -- AUDITION -- Auditory sensation -- Auditory perception -- Adieu to audition -- SOMATOSENSATION -- Transduction of mechanical and thermal energy, and of pain -- Somatotopy -- Somatosensory plasticity -- Phantom limbs and phantom pain -- Proprioception -- Adieu to sensation -- END-OF-CHAPTER QUESTIONS -- REFERENCES -- OTHER SOURCES USED -- FURTHER READING -- Chapter 5 The Visual System -- KEY THEMES -- FAMILIAR PRINCIPLES AND PROCESSES, APPLIED TO HIGHER-LEVEL REPRESENTATIONS -- TWO PARALLEL PATHWAYS -- A diversity of projections from V1 -- A functional dissociation of visual perception of what an object is vs. where it is located -- Interconnectedness within and between the two pathways -- THE ORGANIZATION AND FUNCTIONS OF THE VENTRAL VISUAL PROCESSING STREAM -- Hand cells, face cells, and grandmother cells -- A hierarchy of stimulus representation -- A critical role for feedback in the ventral visual processing stream -- TAKING STOCK -- END-OF-CHAPTER QUESTIONS -- REFERENCES -- OTHER SOURCES USED -- FURTHER READING -- Chapter 6 Spatial Cognition and Attention -- KEY THEMES -- UNILATERAL NEGLECT: A FERTILE SOURCE OF MODELS OF SPATIAL COGNITION AND ATTENTION -- Unilateral neglect: a clinicoanatomical primer -- Hypotheses arising from clinical observations of neglect -- THE FUNCTIONAL ANATOMY OF THE DORSAL STREAM -- Mapping what vs. where in humans with positron emission tomography. Detecting spatial maps with functional magnetic resonance imaging (fMRI) -- Coordinate transformations to guide action with perception -- FROM PARIETAL SPACE TO MEDIAL-TEMPORAL PLACE -- Place cells in the hippocampus -- How does place come to be represented in the hippocampus? -- THE NEUROPHYSIOLOGY OF SENSORY ATTENTION -- A day at the circus -- Attending to locations vs. attending to objects -- Mechanisms of spatial attention -- Effects of attention on neuronal activity -- TURNING OUR ATTENTION TO THE FUTURE -- END-OF-CHAPTER QUESTIONS -- REFERENCES -- OTHER SOURCES USED -- FURTHER READING -- Chapter 7 SKELETON-MOTOR CONTROL -- KEY THEMES -- THE ORGANIZATION OF THE MOTOR SYSTEM -- The anatomy of the motor system -- The corticospinal tract -- The cortico-cerebellar circuit -- The cortico-basal ganglia-thalamic circuits -- FUNCTIONAL

PRINCIPLES OF MOTOR CONTROL -- The biomechanics of motor control
-- Motor cortex -- The neurophysiology of movement -- MOTOR
CONTROL OUTSIDE OF MOTOR CORTEX -- Parietal cortex: guiding how
we move -- Cerebellum: motor learning, balance, ... and mental
representation? -- Basal ganglia -- COGNITIVE FUNCTIONS OF THE
MOTOR SYSTEM -- IT'S ALL ABOUT ACTION -- END-OF-CHAPTER
QUESTIONS -- REFERENCES -- OTHER SOURCES USED -- FURTHER
READING -- Chapter 8 Oculomotor Control and the Control of Attention
-- KEY THEMES -- ATTENTION AND ACTION -- WHYS AND HOWS OF
EYE MOVEMENTS -- Three categories of eye movements -- THE
ORGANIZATION OF THE OCULOMOTOR SYSTEM -- An overview of the
circuitry -- The superior colliculus -- The posterior system -- The
frontal eye field -- The supplementary eye field -- THE CONTROL OF
EYE MOVEMENTS, AND OF ATTENTION, IN HUMANS -- Human
oculomotor control -- Human attentional control -- THE CONTROL OF
ATTENTION VIA THE OCULOMOTOR SYSTEM -- Covert attention --
Where's the attentional controller?.

Are Oculomotor Control and Attentional Control Really the "Same
Thing"? -- The "method of visual inspection" -- "Prioritized Maps of
Space in Human Frontoparietal Cortex" -- OF LABELS AND
MECHANISMS -- END-OF-CHAPTER QUESTIONS -- REFERENCES --
OTHER SOURCES USED -- FURTHER READING -- Section III Mental
Representation -- Introduction to Section III Mental Representation --
REFERENCES -- Chapter 9 Visual Object Recognition and Knowledge --
KEY THEMES -- VISUAL AGNOSIA -- Apperceptive agnosia --
Associative agnosia -- COMPUTATIONAL MODELS OF VISUAL OBJECT
RECOGNITION -- Two neuropsychological traditions -- The cognitive
neuroscience revolution in visual cognition -- CATEGORY SPECIFICITY
IN THE VENTRAL STREAM? -- Are faces special? -- Perceptual expertise
-- Evidence for a high degree of specificity for many categories in
ventral occipitotemporal cortex -- Evidence for highly distributed
category representation in ventral occipitotemporal cortex --
Demonstrating necessity -- RECONCILING THE IRRECONCILABLE --
END-OF-CHAPTER QUESTIONS -- REFERENCES -- OTHER SOURCES
USED -- FURTHER READING -- Chapter 10 Neural Bases of Memory --
KEY THEMES -- PLASTICITY, LEARNING, AND MEMORY -- THE CASE OF
H. M. -- Bilateral medial temporal lobectomy -- Hippocampus vs. MTL?
-- ASSOCIATION THROUGH SYNAPTIC MODIFICATION -- The example
of Pavlovian conditioning -- Hebbian plasticity -- Long-term
potentiation -- The necessity of NMDA channels for longterm memory
formation -- HOW MIGHT THE HIPPOCAMPUS WORK? -- Fast-encoding
hippocampus vs. slow-encoding cortex -- Episodic memory for
sequences -- Episodic memory as an evolutionary elaboration of
navigational processing -- WHAT ARE THE COGNITIVE FUNCTIONS OF
THE HIPPOCAMPUS? -- Standard anatomical model -- Challenges to the
standard anatomical model -- Consolidation -- TO CONSOLIDATE --
END-OF-CHAPTER QUESTIONS -- REFERENCES.

OTHER SOURCES USED -- FURTHER READING -- Chapter 11 Declarative
Long-Term Memory -- KEY THEMES -- THE COGNITIVE NEUROSCIENCE
OF LTM -- ENCODING -- Neuroimaging the hippocampus -- Incidental
encoding into LTM during a short-term memory task -- THE
HIPPOCAMPUS IN SPATIAL MEMORY EXPERTS -- RETRIEVAL -- Retrieval
without awareness -- Documenting contextual reinstatement in the
brain -- Familiarity vs. recollection -- KNOWLEDGE -- END-OF-
CHAPTER QUESTIONS -- REFERENCES -- OTHER SOURCES USED --
FURTHER READING -- Chapter 12 Semantic Long-Term Memory -- KEY
THEMES -- KNOWLEDGE IN THE BRAIN -- DEFINITIONS AND BASIC
FACTS -- CATEGORY-SPECIFIC DEFICITS FOLLOWING BRAIN DAMAGE --

Animacy, or function? -- THE NEUROIMAGING OF KNOWLEDGE -- The meaning, and processing, of words -- PET scanning of object knowledge -- THE PROGRESSIVE LOSS OF KNOWLEDGE -- Primary Progressive Aphasia or Semantic Dementia, what's in a name? -- NUANCE AND CHALLENGES -- END-OF-CHAPTER QUESTIONS -- REFERENCES -- OTHER SOURCES USED -- FURTHER READING -- Chapter 13 Short-Term and Working Memory -- KEY THEMES -- "PROLONGED PERCEPTION" OR "ACTIVATED LTM?" -- DEFINITIONS -- ELEVATED, SUSTAINED ACTIVITY -- Early focus on role of PFC in the control of STM -- Single-unit-delay-period activity in PFC and thalamus -- Working memory -- A BRAVE NEW WORLD OF MULTIVARIATE DATA ANALYSIS -- The tradition of univariate analyses -- MVPA of fMRI -- Retrospective MVPA of single-unit extracellular recordings -- THREE-QUARTERS OF A CENTURY -- END-OF-CHAPTER QUESTIONS -- REFERENCES -- OTHER SOURCES USED -- FURTHER READING -- Section IV High-Level Cognition -- Introduction to Section IV High-level Cognition -- Chapter 14 Cognitive Control -- KEY THEMES -- THE LATERAL FRONTAL-LOBE SYNDROME -- Environmental dependency syndrome -- Perseveration -- Electrophysiology of the frontal-lobe syndrome -- Integration?. MODELS OF COGNITIVE CONTROL.

Sommario/riassunto

Essentials of Cognitive Neuroscience guides undergraduate and early-stage graduate students with no previous neuroscientific background through the fundamental principles and themes in a concise, organized, and engaging manner. Provides students with the foundation to understand primary literature, recognize current controversies in the field, and engage in discussions on cognitive neuroscience and its future. Introduces important experimental methods and techniques integrated throughout the text. Assists student comprehension through four-color images and thorough pedagogical resources throughout the text. Accompanied by a robust website with multiple choice questions, experiment videos, fMRI data, web links and video narratives from a global group of leading scientists for students. For Instructors there are sample syllabi and exam questions.
