Extinctions? 1991 to the Present; References; Bibliography; Acknowledgements; Photo acknowledgements; Index
Sommario/riassunto	Bitter cold and constant snow. Polar bears, seals, and killer whales. Victor Frankenstein chasing his monstrous creation across icy terrain in a dogsled. The arctic calls to mind a myriad different images. Consisting of the Arctic Ocean and parts of Canada, the United States, Russia, Greenland, Finland, Norway and Sweden, the arctic possesses a unique ecosystem-temperatures average negative 29 degrees Fahrenheit in winter and rarely rise above freezing in summer-and the indigenous peoples and cultures that live in the region have had to adapt to the harsh weather conditions. As global tem
