Sommario/riassunto	Developments in educational systems worldwide have largely contributed to the modernization and globalization of present-day society. However, in order to fully understand their impact, educational systems must be interpreted against a background of particular situations and contexts. This textbook brings together more than twenty (collaborative) contributions focusing on the two key themes in the work of Marc Depaepe: educationalization and appropriation. Compiled for his international master classes, these selected writings provide not only a thorough introduction to the history of modern educational systems, but also a twenty-five year overview of the work of a well-known pioneer in the field of history of education.
