Autore	Albanese Alberto
Titolo	Hyperkinetic Movement Disorders [[electronic resource]] : Differential Diagnosis and Treatment
Pubbl/distr/stampa	Hoboken, : Wiley, 2012
ISBN	1-283-45416-5 9786613454164 1-118-22802-2 1-4443-4618-0 1-4443-4615-6
Descrizione fisica	1 online resource (408 p.)
Altri autori (Persone)	JankovicJoseph
Disciplina	616.85 616.8589
Soggetti	Diagnosis, Differential Movement Disorders Hyperkinesia Dyskinesias Central Nervous System Diseases Diagnosis Nervous System Diseases Neurologic Manifestations Diseases Signs and Symptoms Pathological Conditions, Signs and Symptoms Hyperkinesis
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	Hyperkinetic Movement Disorders: Differential diagnosis and treatment; Contents; Preface; List of Contributors; List of Videos; Part 1 General Issues in Hyperkinetic Disorders; 1 Distinguishing Clinical Features of Hyperkinetic Disorders; 2 Pathophysiology and Molecular Pathology of Dystonia and Tics; 3 Pathophysiology and Molecular Pathology of

Tremor, Myoclonus, and Chorea; 4 Overview of the Medical Treatments of Hyperkinetic Disorders; 5 Overview of Surgical Treatment Possibilities in Hyperkinetic Disorders; Part 2 Tremor Syndromes; 6 Essential Tremor; 7 Other Tremors
Part 3 Dystonia Syndromes 8 Primary Dystonias; 9 Secondary Dystonias; Part 4 Chorea Syndromes; 10 Huntington Disease and Other Genetic Choreas; 11 Acquired Choreas; 12 Tics and Tourette Syndrome; 13 Secondary Tics; Part 5 Myoclonus Syndromes; 14 Inherited Myoclonus Syndromes; 15 Segmental Myoclonus; 16 Other Jerks and Startles; Part 6 Ataxias; 17 Clinical and Pathophysiological Features of Cerebellar Dysfunction; 18 Inherited and Sporadic Ataxias; Part 7 Other Hyperkinetic Disorders; 19 Dyskinesias in Parkinsonian Syndromes; 20 Restless Legs Syndrome; 21 Tardive Dyskinesias
22 Stereotypies and Other Developmental Hyperkinesias 23 Paroxysmal Dyskinesias; 24 Psychogenic Movement Disorders; Index; Color Plates

Sommario/riassunto

Hyperkinetic movement disorders comprise a range of diseases characterized by unwanted and uncontrollable, or poorly controllable, involuntary movements. The phenomenology of these disorders is quite variable encompassing chorea, tremor, dystonia, myoclonus, tics, other dyskinesias, jerks and shakes. Discerning the underlying condition can be very difficult given the range and variability of symptoms. But recognizing the phenomenology and understanding the pathophysiology are essential to ensure appropriate treatment. Hyperkinetic Movement Disorders provides a clinical pathway for eff

Nota di contenuto	Front cover; About the authors; Copyright page; Contents; Foreword; Acknowledgements; Preface; 1. Introduction; 2. Managing ecodesign; 3. Environmental assessment tools; 4. Ecodesign strategies; 5. The ecology of products; 6. Packaging; 7. Textiles and clothing; 8. Furniture; 9. Electronic and electrical products; 10. Designing tomorrow today; references; abbreviations; Back Cover
Sommario/riassunto	"There is a huge scarcity of good, practical resources for designers and students interested in minimizing the environmental impacts of products. Design + Environment has been specifically written to address this paucity. The book first provides background information to help the reader understand how and why design for environment (DfE) has become so critical to design, with reference to some of the most influential writers, designers and companies in the field. Next, Design + Environment provides a step-by-step approach on how to approach DfE: to design a product that meets requirements for quality, cost, manufacturability and consumer appeal, while at the same time minimising environmental impacts. The first step in the process is to

undertake an assessment of environmental impacts, using life-cycle assessment (LCA) or one of the many simpler tools available to help the designer. From then on, DfE becomes an integral part of the normal design process, including the development of concepts, design of prototypes, final design and development of marketing strategies. Environmental assessment tools and strategies to reduce environmental impacts, such as the selection of appropriate materials, are then discussed. Next, some of the links between environmental problems, such as global warming, ozone depletion, water and air pollution and the everyday products we consume are considered. In order to design products with minimal environmental impact, we need to have a basic understanding of these impacts and the interactions between them. The four subsequent chapters provide more detailed strategies and case studies for particular product groups: packaging, textiles, furniture, and electrical and electronic products. Guidelines are provided for each of the critical stages of a product's life, from the selection of raw materials through to strategies for recovery and recycling. Finally, Design + Environment takes a look at some of the emerging trends in DfE that are offering us the opportunity to make a more significant reduction in environmental impacts. Both the development of more sustainable materials and technologies and the growing interest in leasing rather than selling products are examined. Design + Environment is organized as a workbook rather than an academic text. It should be read once, and then used as a key reference source. This clear and informative book will prove to be invaluable to practising designers, to course directors and their students in need of a core teaching and reference text and to all those interested in learning about the tools and trends influencing green product design. The authors have all been involved in an innovative demonstration programme called "EcoReDesign", which was developed by the Centre for Design at RMIT University with funding from the Australian government. The Centre successfully collaborated with Australian companies to improve the environmental performance of their products by following DfE principles."--Provided by publisher.

Sommario/riassunto	In diesem Sammelband berichten Akteurinnen und Akteure aus Migrantenorganisationen, Bildungsträgern, kommunaler Verwaltung, Kammern und Forschungseinrichtungen über ihre Erfahrungen und Erkenntnisse bei der Fachkräfteentwicklung in Migrantenunternehmen. Die Impulse zur Entstehung dieses Buches gehen auf einen gleichnamigen Workshop zurück, der von der Landesarbeitsgemeinschaft Migrantenökonomie Baden-Württemberg ausgerichtet wurde und unter bundesweiter Beteiligung stattfand. Der Sammelband umfasst die dort vorgestellten Beiträge von Expertinnen und Experten, die aus ihren jeweiligen beruflichen Kontexten und Perspektiven die Aus- und Weiterbildung in Migrantenunternehmen betrachten. Die Beiträge machen deutlich, dass die Förderung der Aus- und Weiterbildung in Migrantenunternehmen sowohl hinsichtlich der Grundlagen als auch der Zielsetzungen auf neue Füße gestellt werden muss. Denn insgesamt ist ein anderer Blick auf Migrantenunternehmen erforderlich, da die an Quantität ausgerichteten Fragen der Ausbildungsbeteiligung an Bedeutung verlieren, während nunmehr in den Betrieben Herausforderungen ersichtlich werden, die stärker auf

eine qualitative Dimension verweisen.
