Nota di contenuto	Cover; THE THEORY AND TREATMENT OF DEPRESSION TOWARDS A DYNAMIC INTERACTIONISM MODEL; Title Page; Copyright Page; Table of Contents; Foreword; Introduction; Chapter 1 The life cycle of depression; Chapter 2 Mood and memory: A cognitive psychology perspective on maintenance of depressed mood and vulnerability for relapse; Chapter 3 The convergence among psychodynamic and cognitive-behavioral theories of depression: Theoretical overview; Chapter 4 The convergence among psychodynamic and cognitive-behavioral theories of depression: A critical review of empirical research Chapter 5 A dialectic model of personality development and psychopathology: Recent contributions to understanding and treating depression Chapter 6 'Closed doors and landscapes in the mist' 1. Childhood and adolescent depression in developmental psychopathology; Chapter 7 'Closed doors and landscapes in the mist'

2. Depression in psychodynamic developmental psychopathology: From single track models to complex developmental pathways; Chapter 8 Corticotropin releasing factor (CRF) and major depression: Towards an integration of psychology and neurobiology in depression research Epilogue Towards integration in the theory and treatment of depression? The time is now Author / Subject index

Sommario/riassunto

Recent research indicates that depression, once believed to be relatively benign, is highly recurrent and does not respond well to treatment. The goal of this book is to facilitate the development of more encompassing theories and more effective treatments for this disabling disorder by fostering dialogue and enhancing the integration of work across the boundaries of separate fields.
