Sommario/riassunto	Urbanization is one of the major challenges facing China. Of China's 1.3 billion people, around half still live in rural areas. There has been huge migration from rural areas to cities in recent years, a trend that is likely to continue strong for some time. The strains that this vast

migration puts on China's cities are enormous. This book makes available for the English-speaking reader the results of a large group of research projects undertaken by CDRF, one of China's leading think tanks, into the details of rural-urban migration, the resulting urban growth and the problems associated with it.
