

1.	Record Nr.	UNISOBE600200041068
	Titolo	Socialismo e mercato in Jugoslavia : Saggi di Boris Kidric [et al.] / cur. Carlo Boffito
	Pubbl/distr/stampa	Torino, : Einaudi, 1968
	Descrizione fisica	334 p. ; 18 cm
	Collana	Serie politica ; 5
	Lingua di pubblicazione	Italiano
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
2.	Record Nr.	UNINA9910779745803321
	Autore	Quigg Chris
	Titolo	Gauge theories of the strong, weak, and electromagnetic interactions [[electronic resource] /] / Chris Quigg
	Pubbl/distr/stampa	Princeton, NJ, : Princeton University Press, c2013
	ISBN	1-4008-4822-9
	Edizione	[2nd ed.]
	Descrizione fisica	1 online resource (497 p.)
	Classificazione	SCI057000SCI022000
	Disciplina	539.7/5401
	Soggetti	Gauge fields (Physics) Nuclear reactions Strong interactions (Nuclear physics)
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Description based upon print version of record.
	Nota di bibliografia	Includes bibliographical references and index.
	Nota di contenuto	Frontmatter -- Contents -- Preface -- One. Introduction -- Two. Lagrangian Formalism and Conservation Laws -- Three. The Idea of Gauge Invariance -- Four. Non-Abelian Gauge Theories -- Five. Hidden Symmetries -- Six. Electroweak Interactions of Leptons -- Seven. Electroweak Interactions of Quarks -- Eight. Strong Interactions among Quarks -- Nine. Unified Theories -- Epilogue -- Appendix A. Notations

Sommario/riassunto

This completely revised and updated graduate-level textbook is an ideal introduction to gauge theories and their applications to high-energy particle physics, and takes an in-depth look at two new laws of nature--quantum chromodynamics and the electroweak theory. From quantum electrodynamics through unified theories of the interactions among leptons and quarks, Chris Quigg examines the logic and structure behind gauge theories and the experimental underpinnings of today's theories. Quigg emphasizes how we know what we know, and in the era of the Large Hadron Collider, his insightful survey of the standard model and the next great questions for particle physics makes for compelling reading. The brand-new edition shows how the electroweak theory developed in conversation with experiment. Featuring a wide-ranging treatment of electroweak symmetry breaking, the physics of the Higgs boson, and the importance of the 1-TeV scale, the book moves beyond established knowledge and investigates the path toward unified theories of strong, weak, and electromagnetic interactions. Explicit calculations and diverse exercises allow readers to derive the consequences of these theories. Extensive annotated bibliographies accompany each chapter, amplify points of conceptual or technical interest, introduce further applications, and lead readers to the research literature. Students and seasoned practitioners will profit from the text's current insights, and specialists wishing to understand gauge theories will find the book an ideal reference for self-study. Brand-new edition of a landmark text introducing gauge theories
Consistent attention to how we know what we know
Explicit calculations develop concepts and engage with experiment
Interesting and diverse problems sharpen skills and ideas
Extensive annotated bibliographies

3. Record Nr.	UNIORUON00128263
Autore	ARASTEH, A. Reza
Titolo	Faces of persian youth / A. Reza Arasteh
Pubbl/distr/stampa	Leiden, : [s.n.], 1970
Descrizione fisica	1 v. ; 23 cm
Classificazione	IRA XIII
Soggetti	Sociologia - Iran
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
