Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction 1. The Political Philosophy of Leo Strauss 2. The Straussians 3. The Straussian Interventions and the Invasion of Iraq 4. Challenging the Straussian Interventions 5. Deconstructing the Straussian Project 6. Challenging Ontological Foreclosure in Derridean Thought Conclusion
Sommario/riassunto	"The political philosophy of Leo Strauss has been the subject of significant scholarly and media attention in recent years, particularly in the context of the decision to invade Iraq in 2003. During the period since then, questions have been raised regarding the influence of the works of Leo Strauss on the individuals at the highest levels of the Bush administration. This is the first book that engages with the subject in both International Relations (IR) and in other disciplines. The book offers an exploration and demonstration of the ways in which elements of Strauss' thought are visible in the activities of the Bush administration during this period in the spheres of intelligence production, think tanks, and the media. Such an undertaking is not simply to demonstrate these connections and interventions, but also to

challenge the logic underpinning Straussian thought. The book enacts a deconstructive challenge to Strauss' political philosophy which unsettles the fundamental assumptions it relies upon. In doing so, it exposes the securitising imperative underpinning Straussian thought and the Straussian interventions. It thereby contributes to crucial issues relating to IR theory, and contemporary foreign policy, while asserting that these dimensions of IR can and should be dealt with in conjunction with each other. This book would be of interest to students and scholars of IR, Political Theory, Security Studies and US Foreign Policy"
