

1. Record Nr.	UNINA9910779836703321
Titolo	Anti-racism in European football : fair play for all // edited by Christos Kassimeris ; contributors, Kurt Wachter [and seven others]
Pubbl/distr/stampa	Lanham, Maryland : , : Lexington Books, , 2009 ©2009
ISBN	0-7391-2611-3 0-7391-3822-7
Descrizione fisica	1 online resource (211 p.)
Disciplina	796.334094
Soggetti	Racism in sports - Europe Mass media and sports - Europe Soccer - Europe - Public opinion Public opinion - Europe Europe Race relations
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Title Page; Copyright Page; Contents; 1 Introduction Christos Kassimeris; 2 Racism in European Football Christos Kassimeris; 3 Football Against Racism in Europe Kurt Wachter, Susanne Franke and Jaeek Purski; 4 Kick It Out Danny Lynch; 5 Football Unites, Racism Divides Ruth Johnson; 6 Show Racism the Red Card Ged Grebby; 7 Anti-Racism in Football Christos Kassimeris; 8 Conclusion Lina Tsoumpanou; Index; About the Contributors
Sommario/riassunto	Anti-Racism in European Football: Fair Play for All challenges the issue of racism in European football, identifies the causes of the problem, and seeks its remedy.

Autore	Lobzhanidze Irina
Titolo	Finite-State Computational Morphology : An Analyzer and Generator for Georgian // by Irina Lobzhanidze
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2022
ISBN	9783030902483 9783030902476
Edizione	[1st ed. 2022.]
Descrizione fisica	1 online resource (229 pages)
Disciplina	499.96959 499.969
Soggetti	Computational linguistics Applied linguistics Grammar, Comparative and general - Morphology Computational Linguistics Applied Linguistics Morphology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Introduction -- The Georgian Language -- Computational Modeling -- Testing and Evaluation -- Appendices -- Index.
Sommario/riassunto	This handbook provides a comprehensive account of current research on the finite-state morphology of Georgian and enables the reader to enter quickly into Georgian morphosyntax and its computational processing. It combines linguistic analysis with application of finite-state technology to processing of the language. The book opens with the author's synoptic overview of the main lines of research, covers the properties of the word and its components, then moves up to the description of Georgian morphosyntax and the morphological analyzer and generator of Georgian. The book comprises three chapters and accompanying appendices. The aim of the first chapter is to describe the morphosyntactic structure of Georgian, focusing on differences between Old and Modern Georgian. The second chapter focuses on the application of finite-state technology to the processing of Georgian and

on the compilation of a tokenizer, a morphological analyzer and a generator for Georgian. The third chapter discusses the testing and evaluation of the analyzer's output and the compilation of the Georgian Language Corpus (GLC), which is now accessible online and freely available to the research community. Since the development of the analyzer, the field of computational linguistics has advanced in several ways, but the majority of new approaches to language processing has not been tested on Georgian. So, the organization of the book makes it easier to handle new developments from both a theoretical and practical viewpoint. The book includes a detailed index and references as well as the full list of morphosyntactic tags. It will be of interest and practical use to a wide range of linguists and advanced students interested in Georgian morphosyntax generally as well as to researchers working in the field of computational linguistics and focusing on how languages with complicated morphosyntax can be handled through finite-state approaches.
