Switzer, Mary Amanda Dew, ; and Robert K. Twillman -- ; 4. Quality of life in organ transplantation : effects on adult recipients and their families / Mary Amanda Dew, Jean M. Goycoolea, Galen E. Switzer, ; and Aishe S. Allen -- ; 5. Quality of life of geriatric patients following transplantation : short- and long-term outcomes / Maria Paz Gonzalez, Abraham Sudilovsky, Julio Bobes, ; and Andrea F. DiMartini -- ; 6. Cognitive assessment in organ transplantation / Ralph E. Tarter ; and JoAnn

Switala -- ; 7. Pharmacologic issues in organ transplantation: psychopharmacology and neuropsychiatric medication side effects / Paula T. Trzepacz, Babu Gupta, ; and Andrea F. DiMartini -- ; 8. Alcoholism and organ transplantation / Andrea F. DiMartini ; and Paula T. Trzepacz -- ; 9. Ethics and images in organ transplantation / Grant Gillett. ; 10. Psychoneuroimmunology and organ transplantation : theory and practice / Richard Kradin ; and Owen Surman -- ; 11. Pediatric transplantation / Robert D. Canning ; and Margaret L. Stuber -- ; 12. Current trends and new developments in transplantation / Maureen Martin -- Index.

Sommario/riassunto

Organ transplantation is an essential element of treatment for a wide range of diseases, but despite increasing surgical success rates there remain many other issues affecting selection of patients and clinical outcome with which clinicians and patients themselves must be familiar. Originally published in 2000, this book reviews psychosocial, psychiatric and ethical aspects of organ transplantation in a uniquely authoritative way. Drawing heavily on the pioneering work of the Pittsburgh transplant team, it surveys the essentials of transplantation biology before engaging with a range of topics fundamental to the success of the procedure and the quality of life of recipients and donors alike. The interdisciplinary approach and the authority of the contributors will make this book of value to anyone with an interest in organ transplantation procedures.
