

1. Record Nr.	UNINA9910780025203321
Titolo	The biology of terrestrial molluscs [[electronic resource] /] edited by G.M. Barker
Pubbl/distr/stampa	Wallingford, Oxon, UK ; ; New York, NY, USA, : CABI Pub., c2001
ISBN	1-280-81153-6 9786610811533 0-85199-718-X
Descrizione fisica	1 online resource (572 p.)
Altri autori (Persone)	BarkerG. M
Disciplina	594
Soggetti	Mollusks
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contributors; Preface; Acronyms; 1 Gastropods on Land: Phylogeny, Diversity and Adaptive Morphology; 2 Body Wall: Form and Function; 3 Sensory Organs and the Nervous System; 4 Radular Structure and Function; 5 Structure and Function of the Digestive System in Stylommatophora; 6 Food and Feeding Behaviour; 7 Haemolymph: Blood Cell Morphology and Function; 8 Structure and Functioning of the Reproductive System; 9 Regulation of Growth and Reproduction; 10 Spermatogenesis and Oogenesis; 11 Population and Conservation Genetics; 12 Life History Strategies 13 Behavioural Ecology: On Doing the Right Thing, in the Right Place at the Right Time 14 Soil Biology and Ecotoxicology; Index
Sommario/riassunto	Terrestrial molluscs are a successful and diverse animal group in land-based ecosystems, and are important to humans as food, medicine, crop pests, vectors of parasites, tools, ornamentation, and currency in trade. This book offers a synthesis of knowledge on the biology of terrestrial molluscs.
