

1. Record Nr.	UNINA9910780040303321
Autore	Moens Marie-Francine <1957->
Titolo	Automatic indexing and abstracting of document texts [[electronic resource] /] / by Marie-Francine Moens
Pubbl/distr/stampa	Boston, : Kluwer Academic Publishers, c2000
ISBN	1-280-20588-1 9780306470179 9786610205882 0-306-47017-9
Edizione	[1st ed. 2002.]
Descrizione fisica	1 online resource (282 p.)
Collana	The Kluwer international series on information retrieval ; ; 6
Disciplina	025.3/0285
Soggetti	Automatic indexing Automatic abstracting
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. p. [237]-260) and index.
Nota di contenuto	The Indexing and Abstracting Environment -- The Need for Indexing and Abstracting Texts -- The Attributes of Text -- Text Representations and Their Use -- Methods of Automatic Indexing and Abstracting -- Automatic Indexing: The Selection of Natural Language Index Terms -- Automatic Indexing: The Assignment of Controlled Language Index Terms -- Automatic Abstracting: The Creation of Text Summaries -- Applications -- Text Structuring and Categorization When Summarizing Legal Cases -- Clustering of Paragraphs When Summarizing Legal Cases -- The Creation of Highlight Abstracts of Magazine Articles -- The Assignment of Subject Descriptors to Magazine Articles.
Sommario/riassunto	Automatic Indexing and Abstracting of Document Texts summarizes the latest techniques of automatic indexing and abstracting, and the results of their application. It also places the techniques in the context of the study of text, manual indexing and abstracting, and the use of the indexing descriptions and abstracts in systems that select documents or information from large collections. Important sections of the book consider the development of new techniques for indexing and abstracting. The techniques involve the following: using text grammars,

learning of the themes of the texts including the identification of representative sentences or paragraphs by means of adequate cluster algorithms, and learning of classification patterns of texts. In addition, the book is an attempt to illuminate new avenues for future research. Automatic Indexing and Abstracting of Document Texts is an excellent reference for researchers and professionals working in the field of content management and information retrieval.

2. Record Nr.	UNINA9911031677203321
Autore	Hamdan A. L (Abdul Latif)
Titolo	E-Cigarette Smoking, Voice, and Health : A Clinician's Guide to Vaping's Effect on Voice and Breathing // by Abdul-latif Hamdan
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2025
ISBN	3-032-04913-X
Edizione	[1st ed. 2025.]
Descrizione fisica	1 online resource (202 pages)
Collana	Medicine Series
Disciplina	617.51
Soggetti	Otolaryngology Otorhinolaryngology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Part I: Introduction -- Chapter 1: E-cigarette smoking: Prevalence, Associated Intents and Beliefs -- Chapter 2: Vaping and its adverse effects on Health -- Part II: The phonatory system -- Chapter 3: Anatomy and Physiology of Phonation -- Chapter 4: Work-up of patients with Voice Disorders -- Chapter 5: Common vocal fold pathologies -- Part III: Impact of Vaping on Voice -- Chapter 6: Prevalence of voice disorders in e-cigarette users -- Chapter 7: Breathing Disorders in e-cigarette users and their impact on voice -- Chapter 8: Oral Symptoms and Findings in e-cigarette users and their impact on voice -- Chapter 9: Vaping, Sinonasal Diseases and Voice -- Chapter 10: Gastrointestinal disorders in e-cigarette users and their impact on voice -- Chapter 11: Impact of E-cigarettes on the neurologic system -- Chapter 12: Risk of Cancer in E-Cigarette Users.
Sommario/riassunto	This book synthesizes the current literature on the effects of vaping on

voice and discusses the pathophysiology of voice symptoms in affected patients. The detrimental impact of e-cigarette smoking on various systems in the body, including those that affect voice production, is also reviewed. E-cigarette smoking has been shown to impair pulmonary function, which jeopardizes the power source for voice production. It has been associated with an increase in sinonasal and oral symptoms, thus altering voice resonance and quality. Vaping has been linked to reflux disease and esophagitis, putting the defenseless lining of the larynx and pharynx at risk of injury by the gastroduodenal refluxate. Providing insights on the adverse effects of e-cigarette smoking on the phonatory apparatus is of paramount importance, particularly in professional voice users who rely on their voice to make a living. E-Cigarette Smoking, Voice, and Health is addressed to all medical doctors, interns, and health care providers, and in particular to otolaryngologists, laryngologists, speech-language pathologists, and voice therapists.
