1. Record Nr.   UNINA9910780040303321

   Autore   Moens Marie-Francine <1957->

   Titolo   Automatic indexing and abstracting of document texts [[electronic resource] /] / by Marie-Francine Moens

   Pubbl/distr/stampa Boston, : Kluwer Academic Publishers, c2000

   ISBN   1-280-20588-1
                      9780306470179
                      9786610205882
                      0-306-47017-9

   Edizione   [1st ed. 2002.]

   Descrizione fisica 1 online resource (282 p.)

   Collana   The Kluwer international series on information retrieval ; ; 6

   Disciplina   025.3/0285

   Soggetti   Automatic indexing
                      Automatic abstracting

   Lingua di pubblicazione Inglese

   Formato   Materiale a stampa

   Livello bibliografico Monografia

   Note generali   Description based upon print version of record.

   Nota di bibliografia Includes bibliographical references (p. p. [237]-260) and index.

   Nota di contenuto The Indexing and Abstracting Environment -- The Need for Indexing and Abstracting Texts -- The Attributes of Text -- Text Representations and Their Use -- Methods of Automatic Indexing and Abstracting -- Automatic Indexing: The Selection of Natural Language Index Terms -- Automatic Indexing: The Assignment of Controlled Language Index Terms -- Automatic Abstracting: The Creation of Text Summaries -- Applications -- Text Structuring and Categorization When Summarizing Legal Cases -- Clustering of Paragraphs When Summarizing Legal Cases -- The Creation of Highlight Abstracts of Magazine Articles -- The Assignment of Subject Descriptors to Magazine Articles.

   Sommario/riassunto Automatic Indexing and Abstracting of Document Texts summarizes the latest techniques of automatic indexing and abstracting, and the results of their application. It also places the techniques in the context of the study of text, manual indexing and abstracting, and the use of the indexing descriptions and abstracts in systems that select documents or information from large collections. Important sections of the book consider the development of new techniques for indexing and abstracting. The techniques involve the following: using text grammars,

learning of the themes of the texts including the identification of representative sentences or paragraphs by means of adequate cluster algorithms, and learning of classification patterns of texts. In addition, the book is an attempt to illuminate new avenues for future research. Automatic Indexing and Abstracting of Document Texts is an excellent reference for researchers and professionals working in the field of content management and information retrieval.
