Sommario/riassunto	Throughout the twentieth century, American male soldiers returned home from wars with foreign-born wives in tow, often from allied but at times from enemy nations, resulting in a new, official category of immigrant: the "allied" war bride. These brides began to appear en masse after World War I, peaked after World War II, and persisted through the Korean and Vietnam Wars. GIs also met and married former "enemy" women under conditions of postwar occupation, although at times the US government banned such unions. In this comprehensive, complex history of war brides in 20th-century American history, Susan Zeiger uses relationships between American male soldiers and foreign women as a lens to view larger issues of sexuality, race, and gender in United States foreign relations. Entangling Alliances draws on a rich

array of sources to trace how war and postwar anxieties about power and national identity have long been projected onto war brides, and how these anxieties translate into public policies, particularly immigration.

Sommario/riassunto

The challenges facing grassland agronomists are becoming increasingly complex, with environmental and ethical issues assuming a greater significance alongside more conventional technical aspects. This new expanded edition, with an increased emphasis on systems thinking, has been revised to reflect current concerns, knowledge and practice. As such it addresses the need for a different approach to grassland agronomy, providing novel and provocative material to instruct, stimulate and enthuse the reader.
