Nota di bibliografia	Includes bibliographical references. (p. 236-247).
Nota di contenuto	<p>Cover; Islamic identity and development: Studies of the Islamic Periphery; Copyright; Contents; List of figures; A note on terminology; Introduction; Part one: The Islamic identity crisis; 1. Identity crisis in the Islamic Periphery: Turkey and Malaysia; Part two: The Islamic dilemma; 2. Islamic underdevelopment: cause and response; 3. The Islamic social contract: the quest for social justice and the problem of legislation; 4. Islam and economic development: the problem of compatibility; Part three: Development in the Islamic Periphery: the nationalist phase</p> <p>5. Nationalism confronts Islam: the modernization debate in Malaysia and Turkey 6. Turkish etatism: creation of a non-competitive economy; 7. Malaysian development by trusteeship: the broken trust; Part four: Development in the Islamic Periphery: the modern state and the privatization challenge; 8. Islam, the modern state and imperfect competition: to ban or to regulate?; 9. Privatizing the Malaysian economy: transition from a national to a market ideology; 10. Privatizing the Turkish economy; Part five: Conclusion; 11. Responsible development in the Islamic Periphery: regulation, competition and public policy Glossary; References; Index</p>
Sommario/riassunto	<p>Turkey and Malaysia, two countries on the Islamic periphery, are often not included in discussions of Islamic reassertion and identity. Yet both have been at the forefront of modernization and development, and are exposed to a rising trend of Islamic revival which discloses a deep, psychological identity crisis. In <i>Islamic Identity and Development</i>, Ozay Mehmet examines this identity crisis in the wider context of the Islamic dilemma of reconciling nationalism with Islam. He sees the Islamic revival primarily as a protest movement, concentrated among urban migrant settlements.</p>

Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Cover; Prelims; Contents; Foreword; About the authors; Introduction; How is the book structured?; Chapter 1 Compassionate and dignified care; Chapter 2 Professionalism - on becoming a professional; Chapter 3 Problem -solving in healthcare; Chapter 4 Applying appreciative inquiry in practice and education; Chapter 5 Creativity and care; Chapter 6 Applying the three-eye model to healthcare; Chapter 7 Mindful healthcare practice; Chapter 8 The appreciative care worker and coach; Chapter 9 Conclusion; References; Bibliography
Sommario/riassunto	Written by a leading healthcare academic and an accredited international business coach, this book takes a new approach to one of the most crucial issues in healthcare - how to care for patients appreciatively, responsively and compassionately. In the light of the findings of the Francis Report (2013), and at a time when healthcare services are under enormous pressure, there is a clear and urgent need for such a book. Despite the challenges of ill health, the authors demonstrate that the opportunity is there for any healthcare practitioner to draw out what the patient needs and desires, in line with the principles of appreciative inquiry.

Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references at the end of each chapters.
Nota di contenuto	Part 1. Haplotype and Saline Environment -- 1. Haplotype Definition and Classification -- 2. Saline Environments. - Part 2. Major Anatomical Adaptations -- 3. Succulence -- 4. Tracheoidioblasts (spiral cells) and Stererdes (spicular cells) -- 5. Salt Secretion -- 6. Kranz Anatomy -- 7. Successive Cambia -- 8. Bulliform Cells.
Sommario/riassunto	This book describes important anatomical adaptations in halophytes, based on a large review of relevant literature (since the 17th century) and recent research findings. Scientists involved in the study of plant biology, from a molecular to ecosystemic level, will find information about all major structural strategies of salt tolerant plants. The book starts with an introductory theoretical background, where several aspects related to the definition and classification of halophytes and saline environments are included. Major anatomical adaptations are then grouped around major concepts: succulence, tracheoidioblasts, salt secretion, Kranz anatomy, successive cambia, and bulliform cells. Each of them is treated following a general scheme: introductory considerations, anatomical basis, and ecological implications; a review

of relevant literature is then conducted and the text is supported by a large number of figures, especially ink drawings and color micrographs.
