Sommario/riassunto

Feminism and the Contradictions of Oppression is a penetrating and comprehensive study of the development of feminism over the last thirty years. The first part of this major new textbook examines feminist theory and feminist political strategy. The second section examines how contradictions of class, race, subculture and sexuality divide women. The final part explores ways out of the impasse. This level-headed and challenging book is one of the most notable contributions to feminism in recent years.
