Sommario/riassunto	<p>The dramatic growth of the Internet in recent years has provided opportunities for a host of relationships and communities--forged across great distances and even time--that would have seemed unimaginable only a short while ago. In Building Diaspora, Emily Noelle Ignacio explores how Filipinos have used these subtle, cyber, but very real social connections to construct and reinforce a sense of national, ethnic, and racial identity with distant others. Through an extensive analysis of newsgroup debates, listserves, and website postings, she illustrates the significant ways that computer-mediated communication has contributed to solidifying what can credibly be called a Filipino diaspora. Lively cyber-discussions on topics including Eurocentrism, Orientalism, patriarchy, gender issues, language, and "mail-order-brides" have helped Filipinos better understand and articulate their postcolonial situation as well as their relationship with other national and ethnic communities around the world. Significant attention is given to the complicated history of Philippine-American relations, including the ways Filipinos are racialized as a result of their political and economic subjugation to U.S. interests. As Filipinos and many other ethnic groups continue to migrate globally, Building Diaspora makes an important contribution to our changing understanding of "homeland." The author makes the powerful argument that while home is being further removed from geographic place, it is being increasingly territorialized in space.</p>

Sommario/riassunto	<p>Comparing Asian Politics presents an invaluable comparative examination of politics and government in three Asian nations: India, China, and Japan. The author elucidates the links between politics and each nation's distinctive cultural and historical contexts and demonstrates the intermingling and grafting of Asian traditions with the influence of Western values and institutions. National identity, political cohesion, and socioeconomic change emerge as central to how politics has developed in each nation-state. Also included are focus boxes on political and social issues in other important countries in Asia. The book provides insight into topics such as the significance of constitutions in the political process; the parliamentary system in Asia; the regionalization of politics and the importance of levels of government; the decay of one-party rule; the links between development and democratization; and the impact of globalization. This essential text not only illuminates the politics of India, China, and Japan in relation to one another, it also suggests to readers how their own experience of politics can be informed by understanding the politics and government of these three Asian nations. In this new edition, the author includes a discussion on the recent political changes in China and the election of Xi Jinping in early 2013, the devastating earthquake and tsunami that hit Japan in 2011, and the recent elections in India.</p>

Sommario/riassunto	There has been little research on tourism in those European countries or regions which lie outside the continent's main centres of production and population, even though tourism may be one of the few economic

options open to them. This volume aims to fill a gap by presenting a range of case studies - including northern Sweden, the Orkneys, the tip of Norway and northern Cyprus - on tourism in the peripheral areas of Europe. Taking as a leitmotiv the paradoxes inherent in developing places whose very attraction may lie in their lack of development, the case studies investigate and illustrate bo
