Sommario/riassunto	In the wake of World War II, Secretary of War Henry L. Stimson and President Harry S. Truman established the U.S. Strategic Bombing Survey, to determine exactly how effectively strategic air power had been applied in the European theater and in the Pacific. The final study, consisting of over 330 separate reports and annexes, was staggering in its size and emphatic in its conclusions. As such it has for decades been used as an objective primary source and a guiding text, a

veritable Bible for historians of air power.
