Sommario/riassunto

It is a truism in psychology that self and autobiographical memory are linked, yet we still know surprisingly little about the nature of this relation. Scholars from multiple disciplines, including cognitive psychology, developmental psychology, anthropology, and philosophy have begun theorizing and writing about the ways in which autobiographical memory is organized, the role that narratives play in the development of autobiographical memory, and the relations between autobiographical memory, narrative, and self concept. If narratives are a critical link between memory and self, then it becom
