Sommario/riassunto

The twenty-one original essays in this volume offer a rigorous reconsideration of modern forms of paternity and friendship as they emerge in works by writers and philosophers from the eighteenth through the twentieth century. Exploring various models of these twin themes, contributors examine writings of canonical figures such as Goethe, Schiller, Holderlin, Kleist, and Brentano, as well as Kafka, Benjamin, and Arendt.

Sommario/riassunto	The aim of this book is to present and analyze philosophical conceptions concerning mathematics and logic as formulated by Polish logicians, mathematicians and philosophers in the 1920s and 1930s. It was a remarkable period in the history of Polish science, in particular in the history of Polish logic and mathematics. Therefore, it is justified to ask whether and to what extent the development of logic and mathematics was accompanied by a philosophical reflection. We try to answer those questions by analyzing both works of Polish logicians and mathematicians who have a philosophical temperament as well as their research practice. Works and philosophical views of the following Polish

scientists will be analyzed: Wacław Sierpiski, Zygmunt Janiszewski, Stefan Mazurkiewicz, Stefan Banach, Hugo Steinhaus, Eustachy Ylisk and Leon Chwistek, Jan Łukasiewicz, Zygmunt Zawirski, Stanisław Leniewski, Tadeusz Kotarbiński, Kazimierz Ajdukiewicz, Alfred Tarski, Andrzej Mostowski and Henryk Mehlberg, Jan Śleszyński, Stanisław Zaremba and Witold Wilkosz. To indicate the background of scientists being active in the 1920s and 1930s we consider in Chapter 1 some predecessors, in particular: Jan Łukasiewicz, Józef Maria Hoene-Wroński, Samuel Dickstein and Edward Stamm.
