

1. Record Nr.	UNINA9910780264703321
Titolo	Lotus instant messaging/Web conferencing (Sametime) [[electronic resource]] : building Sametime-enabled applications / / [John Bergland ... et al.]
Pubbl/distr/stampa	[S.l.] : IBM, International Technical Support Organization, 2003
Edizione	[1st ed.]
Descrizione fisica	xvi, 480 p. : ill
Collana	IBM redbooks
Altri autori (Persone)	BerglandJohn
Disciplina	004.69
Soggetti	Computer conferencing - Computer programs Instant messaging - Computer programs
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"November 2003."
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	<p>This IBM Redbooks publication builds upon two existing Redbooks: Working with Sametime Client Toolkits, SG24-6666 and Working with the Sametime Community Server Toolkit, SG24-6667. Focusing on the latest toolkits available for IBM Lotus Instant Messaging and Lotus Web Conferencing (Sametime) 3, it explores Sametime as a development platform, illustrating how to extend the functionality of Sametime beyond its more commonly known instant messaging and e-meeting hosting features. It provides a detailed technical discussion and examples for building and integrating Sametime real-time collaborative capabilities, presence awareness, and Web conferencing capabilities into both new and existing applications. In-depth discussions and code examples are provided for topics such as building custom bots, leveraging Sametime functionality through Web Services, and integrating Sametime into workflow applications. Additionally, this book reveals how you can customize (brand) your organization's Sametime Meeting Center to more closely match the company's identity. Finally, thorough analysis is given to the topics of Sametime Links and the Sametime Places architecture. Several samples of Sametime applications, with source code, are included. Ultimately, we hope this book will help you better appreciate how your organization</p>

may benefit by more effectively leveraging Sametime. Please note that the additional material referenced in the text is not available from IBM.
