Sommario/riassunto	'Christ on a Donkey' reveals Palm Sunday processions and related royal entries as both processional theatre and highly charged interpretations of the biblical narrative. Harris's narrative ranges from ancient Jerusalem to modern-day Bolivia, from veneration to iconoclasm, and from Christ to Ivan the Terrible. A curious theme emerges: those representations of Christ's entry into Jerusalem that were labelled blasphemous or idolatrous by those in power were most faithful to the

biblical narrative of Palm Sunday, while those that exalted power and celebrated military triumph were arguably blasphemous pageants.

Sommario/riassunto

Rumination (recyclic negative thinking), is now recognised as important in the development, maintenance and relapse of recurrence of depression. For instance, rumination has been found to elevate, perpetuate and exacerbate depressed mood, predict future episodes of depression, and delay recovery during cognitive therapy. Cognitive therapy is one of the most effective treatments for depression. However, depressive relapse and recurrence following cognitive therapy continue to be a significant problem. An understanding of the psychological processes which contribute to relapse and recur
