Sommario/riassunto	<p>In TV star Lauren Conrad's deliciously entertaining novel about young Hollywood, the lies are only as sweet as the people telling them. Jane Roberts was the average girl next door until she and her best friend Scarlett Harp landed their own reality show, L.A. Candy. Suddenly they found themselves thrown into the public eye with VIP tickets to everything. But the starlets quickly discover that fame goes hand in hand with scandal when Jane finds herself the centre of attention for all the wrong reasons. Even her relationship with Scarlett is threatened. Things go from bad to worse when Scarlett falls for a guy who is strictly off limits... In reality TV nothing stays secret for long and with all this drama L.A. Candy's ratings rocket. The show is a bona fide hit - but can the girls stand another season in the spotlight?</p>

Nota di contenuto	Macro Framework Issues, Historical Context, and Institutional Change -- Fostering Change: Innovation and Institutions as a Dual Analytical Framework -- The NRC in Historical Context -- The NRC in the Past Decade: A Closer Look at Institutional Change -- NRC Institutes and Programs: Institutional Change at the Mezzo and Micro Levels of Innovation -- The Biotechnology Research Institute -- The Institute for Research in Construction -- The Herzberg Institute of Astrophysics -- The Industrial Research Assistance Program: Advice, Networks, and Money -- National and Local Innovation Systems and the NRC's Competitor-Partner Institutions.
Sommario/riassunto	In this first in-depth examination of the governance of the National Research Council of Canada (NRC) in over twenty-five years, G. Bruce Doern and Richard Levesque show how the agency's history is interwoven with the evolution of Canada's economic and industrial development and with the fostering of science at Canada's universities,

in industry, and within the federal government. Using a policy and institutional approach, the authors demonstrate the ways in which the NRC has had to simultaneously absorb significant budgetary and personnel cuts and become, in its own structure and operations, an innovating institution that helps support and facilitate an innovating Canadian economy - one increasingly characterized by knowledge-based industries. By reconfiguring itself in terms of its institutional mix of hierarchies, networks, and markets, the NRC has had to confront and change its own traditions, yet maintain itself as a complex government agency that still values research for its own sake as a public good.
