Descrizione fisica	1 online resource (216 p.)
Collana	The Joan Palevsky imprint in classical literature
Disciplina	330.938
Soggetti	HISTORY / Ancient / General Greece History Greece Economic conditions To 146 B.C
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Covers period from roughly 800 BCE to 200 CE and all cities founded by Greeks, including those outside of Greece.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Frontmatter -- Contents -- Foreword -- Introduction -- 1. The Greek Cities and the Economy -- 2. The World of Agriculture -- 3. Craft Industries and Business Ventures -- Conclusion -- Bibliography -- Index
Sommario/riassunto	The Economy of the Greek Cities offers readers a clear and concise overview of ancient Greek economies from the archaic to the Roman period. Léopold Migeotte approaches Greek economic activities from the perspective of the ancient sources, situating them within the context of the city-state (polis). He illuminates the ways citizens intervened in the economy and considers such important sectors as agriculture, craft industries, public works, and trade. Focusing on how the private and public spheres impinged on each other, this book provides a broad understanding of the political and economic changes affecting life in the Greek city-states over a thousand-year period.

Marx's Devastating Critique of Capitalism -- Chapter 4. Ethics and Education: Possessive Individualism Versus Global Caring -- Chapter 5. The Super Rich: Billions Versus Poverty -- Chapter 6. Ever Expanding Militarism -- Chapter 7. Why So Many Guns and Prisons? -- Chapter 8. Water and Land -- Chapter 9. Conclusion: "Time and Tides Wait for No One".
Sommario/riassunto	It is increasingly apparent that capitalism cannot stave off the truly frightening ecological disasters that threaten the future of life on earth.

Is it an accident that the strongest and most capitalist economic force in the world, the US, is also that force that is most prone to the denial of the enormous dangers of global warming? While capitalism is a global force, it is not supported by the majority of the world, and much more thought and action is needed to integrate and globalize movements against oppression, injustice and ecological destruction. While changes at a local level are important and more feasible in our current world, ultimately changes at a global level may have greater long-term importance, and we need to greatly expand theorizations and mobilizations in this direction now. Robert Albritton proposes 'practical utopias' as a process of thinking by which short-term changes tend in the direction of desirable changes in the longterm.
