

1. Record Nr.	UNINA9910780465903321
Autore	Spencer David J
Titolo	Knitting technology : a comprehensive handbook and practical guide / / David J. Spencer
Pubbl/distr/stampa	Cambridge, England : , : Woodhead Publishing Limited, , 2001
ISBN	1-280-37207-9 9786610372072 1-59124-760-8
Edizione	[Third edition]
Descrizione fisica	1 online resource (413 pages)
Collana	Woodhead publishing series in textiles
Disciplina	677/.028245
Soggetti	Machine knitting Knitting machines Knitting - Technique Technology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	First published: Pergamon Press, 1983 Includes index.
Nota di contenuto	Front Cover; Knitting Technology: A Comprehensive Handbook and Practical Guide; Copyright Page; Dadication; Table of Contents; List of figures; Preface; Acknowledgements; Chapter1. An introduction to textile technology; 1.1 The evolution of textiles; 1.2 Textile fabrics; 1.3 Textile yarns and fibres; 1.4 Yarn count numbering systems; 1.5 Conversion formulae; Chapter 2. From hand knitting to hand frame knitting; 2.1 The evolution of hand knitting; 2.2 The spread of knowledge of hand pin knitting; 2.3 The principles of hand knitting using two pins; 2.4 The invention of the stocking hand frame 2.5 The bearded needle 2.6 The principles of frame knitting; 2.7 The evolution of other weft knitting machines; 2.8 The development of warp knitting; 2.9 The potential of knitting technology; 2.10 Meeting the challenge of new markets; Chapter 3. General terms and principles of knitting technology; 3.1 Machine knitting; 3.2 The knitted loop structure; 3.3 A course; 3.4 A wale; 3.5 Stitch density; 3.6 Technically upright; 3.7 Design appearance requirements; 3.8 The main features of the knitting machine; 3.9 The needle; 3.10 Fabric draw-off; 3.11 The

front of rectilinear needle bar machines

3.12 The basic knitting action of a needle 3.13 The bearded needle;  
3.14 The latch needle; 3.15 Friction and frictionless needles; 3.16 The  
bi-partite compound needle; 3.17 A comparison of latch and  
compound needles; 3.18 Machine gauge; Chapter 4. Basic mechanical  
principles of knitting technology; 4.1 The sinker; 4.2 The jack; 4.3  
Cams; 4.4 The two methods of yarn feeding; 4.5 The three methods of  
forming yarn into needle loops; Chapter 5. Elements of knitted loop  
structure; 5.1 The needle loop; 5.2 The sinker loop; 5.3 Warp knitted  
laps; 5.4 The overlap; 5.5 The underlap; 5.6 The closed lap  
5.7 The open lap 5.8 Wrapping; 5.9 The knitted stitch; 5.10 The  
intermeshing points of a needle loop; 5.11 The face loop stitch; 5.12  
The reverse loop stitch; 5.13 Single-faced structures; 5.14 Double-  
faced structures; 5.15 A balanced structure; 5.16 Face and reverse  
stitches in the same wale; 5.17 Selvedged fabric; 5.18 Cut edge fabric;  
5.19 Tubular fabric; 5.20 Upright loop structures; 5.21 Knitting  
notations; Chapter 6. Comparison of weft and warp knitting; 6.1 Yarn  
feeding and loop formation; 6.2 The two industries; 6.3 Productivity;  
6.4 Machine design  
6.5 Comparison of patterning and fabric structures 6.6 Course length  
and run-in per rack; 6.7 Fabric quality; 6.8 Structural modifications  
commonly used in weft and warp knitting; Chapter 7. The four primary  
base weft knitted structures; 7.1 Introduction; 7.2 Plain structure; 7.3  
Rib structure; 7.4 Interlock structure; 7.5 Purl structure; Chapter 8. The  
various types of weft knitting machines; 8.1 Fabric machines and  
garment-length machines; 8.2 Knitting welts and rib borders; 8.3  
Integral knitting; 8.4 The three classes of weft knitting machines  
Chapter 9. Stitches produced by varying the sequence of the needle  
loop intermeshing

---

## Sommario/riassunto

The third edition of Knitting technology, widely recognised as the definitive text on the subject, has been thoroughly revised and updated to include all the latest developments. Beginning with the fundamental principles and moving on to more advanced aspects, it combines in a single comprehensive volume the basics of warp and weft knitting, fabric structures and products, the different types of machines, principles of production and terminology to provide an invaluable reference for textiles students, textile engineers and technicians involved in knitted garment design and manufacture.
