1. Record Nr.   UNINA9910780469403321

   Autore   Axelson Jan

   Titolo   Embedded ethernet and internet complete [[electronic resource]] : designing and programming small devices for networking / / Jan Axelson

   Pubbl/distr/stampa Madison, Wis., : Lakeview Research, c2003

   ISBN   1-280-56709-0
                       9781931448019
                       9786610567096
                       1-931448-01-9

   Descrizione fisica 1 online resource (497 p.)

   Disciplina   004.65
                       004.67/8

   Soggetti   Ethernet (Local area network system)
                       Internet
                       Embedded computer systems
                       Computer networks

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Note generali   Includes index.

   Nota di contenuto   Cover; Title Page; Copyright Page; Table of Contents; Introduction; 1. Networking Basics; 2. Building a Network: Hardware Options; 3. Design Choices; 4. Using the Internet Protocol in Local and Internet Communications; 5. Exchanging Messages Using UDP and TCP; 6. Serving Web Pages with Dynamic Data; 7. Serving Web Pages that Respond to User Input; 8. E-mail for Embedded Systems; 9. Using the File Transfer Protocol; 10. Keeping Your Devices and Network Secure; Index

   Sommario/riassunto Bringing together two areas of computer technology?networking and embedded systems?this developer's guide offers guidance and examples for each of these, with a focus on the special requirements and limits of embedded systems. Because developing an embedded system for networking requires knowledge from many areas, including circuit design, programming, network architecture, and Ethernet and Internet protocols, developers are given valuable technical information

on each that can be put to use right away. Covered are the advantages and limits of using Ethernet to connect embedded systems in

Sommario/riassunto   According to a profile in The Guardian, Mary Midgley is 'the foremost scourge of scientific pretensions in this country; someone whose wit is admired even by those who feel she sometimes oversteps the mark'. Considered one of Britain's finest philosophers, Midgley exposes the illogical logic of poor doctrines that shelter themselves behind the prestige of science. Always at home when taking on the high priests of evolutionary theory - Dawkins, Wilson and their acolytes - she has famously described evolution as 'the creation-myth of our age'. In Evolution as a Religion, she ex
