---

Sommario/riassunto

This level of nurse works largely independently and their work is managed rather than supervised. They are able to demonstrate their duties to less experienced employees and supervise students, and can undertake surveys or audits. They may occasionally participate in research and development, clinical trials or equipment testing. The second edition of The Informed Practice Nurse offers both the new and experienced practice nurse the opportunity to reflect on their current practice. The chapter content is evidence based and accurately referenced, making it an essential text for students on un
