|-------------------------|---|
| 1. Record Nr. | UNINA9910780482803321 |
| Autore | Stavroulakis Peter |
| Titolo | Interference analysis and reduction for wireless systems // Peter Stavroulakis |
| Pubbl/distr/stampa | Boston, Massachusetts : , : Artech House, , ©2003 [Piscataway, New Jersey] : , : IEEE Xplore, , [2002] |
| ISBN | 1-58053-574-7 |
| Descrizione fisica | 1 online resource (427 p.) |
| Collana | Mobile communications series |
| Disciplina | 621.382/24 |
| Soggetti | Radio - Interference Cell phone systems - Protection |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | Description based upon print version of record. |
| Nota di bibliografia | Includes bibliographical references and index. |
| Nota di contenuto | Machine generated contents note: 1. Overview of Wireless Information Systems -- 2. Wireless Channel Characterization and Coding -- 3. Transmission Systems in an Interference Environment -- 4. Optimal Detection in Fading Channels -- 5. |
| Sommario/riassunto | "Interference Analysis and Reduction for Wireless Systems offers a New methodology for analyzing and studying the behavior of wireless communication systems in an interference environment. It provides modern tools and techniques for use in real-world applications that help engineers guarantee optimum system performance. The book treats both additive and multiplicative interfering signals, including in-depth descriptions of how these signals behave, regardless of the source. Hands-on details are provided to help practitioners."--Jacket. |
