Sommario/riassunto	This volume brings together the most current empirical research on two important innovations reshaping American education today--voucher programs and charter schools. Contributors include the foremost analysts in education policy. Of specific significance is cutting-edge research that evaluates the impact of vouchers on academic performance in the New York City, Washington, D.C., and Dayton, Ohio, school systems. The volume also looks beyond the American experience to consider the impact of market-based education

as pioneered by New Zealand. Contributors also take stock of the movement's effect
