

1. Record Nr.	UNINA9910780511303321
Autore	Guppy Crispin Spencer <1953->
Titolo	Butterflies of British Columbia [[electronic resource]] : including western Alberta, southern Yukon, the Alaska Panhandle, Washington, northern Oregon, northern Idaho, northwestern Montana // Crispin S. Guppy and Jon H. Shepard
Pubbl/distr/stampa	Vancouver, : UBC Press, 2001
ISBN	1-283-11202-7 9786613112026 0-7748-5623-8
Descrizione fisica	1 online resource (415 p.)
Altri autori (Persone)	ShepardJon <1941->
Disciplina	595
Soggetti	Butterflies - British Columbia Butterflies - Northwest, Pacific
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"A Royal British Columbia Museum book."
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	""CONTENTS""; ""ACKNOWLEDGMENTS""; ""INTRODUCTION""; ""The Study of Butterflies in British Columbia""; ""Postglacial Origins of the Butterfly Fauna of British Columbia""; ""Impact of Humans on the Butterfly Fauna of British Columbia""; ""Conservation of Butterflies in British Columbia""; ""Butterfly Gardens""; ""Morphology of Immature and Adult Butterflies""; ""Biology of Butterflies""; ""Seasonal Changes in Butterfly Fauna""; ""SPECIES ACCOUNTS""; ""Organization of the Species Accounts""; ""SUPERFAMILY HESPERIOIDEA (Skippers)""; ""FAMILY HESPERIIDAE (Skippers)"" ""Subfamily Pyrginae (Spread-wing Skippers)""""Subfamily Hesperinae (Grass Skippers)""; ""SUPERFAMILY PAPILIONOIDEA (The Butterflies)""; ""FAMILY PAPILIONIDAE (Swallowtails and Apollos)""; ""Subfamily Parnassiinae (Apollos)""; ""Subfamily Papilioninae (Swallowtails)""; ""FAMILY PIERIDAE (Whites, Marbles, and Sulphurs)""; ""Subfamily Pierinae (Whites)""; ""Subfamily Anthocharinae (Marbles and Orangetips)""; ""Subfamily Coliadinae (Sulphurs)""; ""FAMILY LYCAENIDAE (Gossamer Wings)""; ""Subfamily Lycaeninae (Coppers)""; ""Subfamily Theclinae (Hairstreaks)""; ""Subfamily Polyommatainae (Blues)""

Sommario/riassunto

Butterflies are found everywhere in British Columbia, from balcony planter boxes in the city to the vast, unexplored expanses of boreal forest and mountains across the north, and from coastal bogs and wild ocean shorelines to the deserts of the southern interior. The total known fauna of 187 species of butterflies in B.C. is by far the largest and most diverse in Canada. Butterflies of British Columbia summarizes all available information on the butterflies of B.C. The 187 species and 264 subspecies of butterflies known from B.C., as well as 9 additional hypothetical species, are discussed with descriptions of identifying features, immature stages, larval foodplants, biology and life history, range and habitat, and conservation status. In addition, descriptions are provided for 11 new subspecies. Each species treatment also contains maps of the northwestern North American distribution, colour photographs of adults of all species and subspecies, and flight season graphs. The book includes an extensive general introduction to the study of butterflies, containing chapters on the history of butterfly study in B.C., the post-glacial colonization of B.C. by butterflies, the effects of European colonization on the fauna, butterfly conservation, butterfly gardening, ecology, morphology, and biology. Butterflies of British Columbia provides butterfly watchers, naturalists, and biologists with an overview of the fascinating butterfly fauna of B.C. and adjacent areas. It can be used by naturalists to identify all the butterfly species and subspecies in B.C. and adjacent areas and includes a wide range of information about both butterflies in general and individual species. There is also much original information in the book that scientists will find invaluable, especially the description of 11 new subspecies and a complete reassessment of the taxonomy of the species.
