Canada and the United States exchange the world's highest level of bilateral trade, valued at \$1.4 billion a day. Two-thirds of this trade travels on trucks. Heavy Traffic examines the way in which the regulatory reform of American and Canadian trucking, coupled with free trade, has internationalized this vital industry. Before deregulation, restrictive entry rules had fostered two separate national highway transportation markets, and most international traffic had to be exchanged at the border. When the United States deregulated first, the imbalance between its opened market and Canada's still-restricted one produced a surprisingly difficult bilateral dispute. American deregulation was motivated by domestic incentives, but the subsequent Canadian deregulation blended domestic incentives with transborder rate comparisons and concerns about trade competitiveness. Daniel Madar shows that deregulation created a de facto regime of free trade in trucking services. Removing regulatory barriers has enabled Canadian and American carriers to follow the expansion of transborder traffic that began with the Canada-US Free Trade Agreement and continues with NAFTA. The services available with deregulated trucking have also supported sweeping changes in industrial logistics. As transborder traffic has surged, the two countries' carriers -- from billion-dollar corporations to family firms -- have exploited the latitude provided by deregulation. This book is a valuable contribution to our understanding of the policy processes and economic conditions that led to trucking deregulation. As a study in public policy formation and the international effects of reform, it will be of interest to students and scholars of political economy, international relations, and transportation.

Sommario/riassunto	Each family has its secrets, ones that shape family communication and relationships in a way generally unknown to the outsider and often the family itself. Autoethnographers, students of these relationships, confront many silences in their attempts to understand these social worlds. It is often the accidental slip, the spontaneous discussion, the offhanded comment that opens this terrain of secrets to the conscientious storyteller. Accidental Ethnography delves into this shadowy world of pain and loss in the hopes of finding productive, ethical avenues for transforming the secret lives of families into powerful narratives of hope. It merges autoethnographic method with the therapeutic power of storytelling to heal family wounds. Poulos's lyrical text will appeal to those in ethnography, interpersonal communication, and family relationships alike.
