Orton -- A round-table discussion of teen parenting as a social and ethical issue -- On choice, responsibility, and entitlement -- David Checkland and James Wong.

Sommario/riassunto	"Teen pregnancy and parenting are widely considered to be a social problem. These original essays, arising from a conference at Ryerson Polytechnic University, explore the many factors affecting how Canadian society responds to, and creates, the phenomenon of teen parenting. The contributors bring expertise from diverse disciplines, including education, social work, sociology, history, and philosophy, to address matters of social policy on the issue." "The study's new findings, the interdisciplinary approach, and the Canadian focus make this unique gathering of facts and ideas an essential resource for students of sociology, health and women's studies, philosophy, urban youth culture, and public policy."--Jacket
