

1. Record Nr.	UNINA9910780650203321
Autore	Wilson-Pauwels Linda
Titolo	Cranial nerves in health and disease / / Linda Wilson-Pauwels [et al.]
Pubbl/distr/stampa	Hamilton, Ont. : , : B.C. Decker, , 2002
ISBN	1-282-27494-5 9786612274947 1-60795-063-4
Edizione	[Second edition.]
Descrizione fisica	1 online resource (ix, 245 pages) : illustrations
Disciplina	611.8/3
Soggetti	Nerves, Cranial Nerves, Peripheral
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Sommario/riassunto	Featuring color-coded illustrations, this classic work describes how the twelve major nerve systems connect the brain to the body systems they control. These drawings show the course and position of each nerve, as well as the functional modalities of each nerve. This way, students can learn not only the location of each nerve system, but how the systems act in concert to perform specific functions. It's a tremendous teaching tool for all health sciences students who study neuro- and gross anatomy, including students in medicine, dentistry, pharmacy, nursing, and physical therapy
