1.	Record Nr.	UNINA9910780720303321
	Titolo	Lexical representation [[electronic resource]] : a multidisciplinary approach / / edited by Gareth Gaskell, Pienie Zwitserlood
	Pubbl/distr/stampa	Berlin ; ; New York, : De Gruyter Mouton, 2011
	ISBN	1-283-16508-2 9786613165084 3-11-022493-3
	Descrizione fisica	1 online resource (258 p.)
	Collana	Phonology and phonetics, , 1861-4191 ; ; 17
	Classificazione	ES 160
	Altri autori (Persone)	GaskellM. Gareth ZwitserloodPienie
	Disciplina	401/.9
	Soggetti	Lexicology Psycholinguistics Grammar, Comparative and general - Word formation Grammar, Comparative and general - Morphology
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Description based upon print version of record.
	Nota di bibliografia	Includes bibliographical references and index.
	Nota di contenuto	Frontmatter -- Acknowledgements -- Contents -- Lexical representation: A multidisciplinary approach / Zwitserlood, Pienie / Gaskell, Gareth -- Semantic constraints on morphological processing / Rastle, Kathleen / Merkx, Marjolein -- The lexicon and phonetic categories: Change is bad, change is necessary / Samuel, Arthur G. -- Early links in the early lexicon: Semantically related word-pairs prime picture looking in the second year / Styles, Suzy / Plunkett, Kim -- Words: Discrete and discreet mental representations / Lahiri, Aditi -- Neural systems underlying lexical competition in auditory word recognition and spoken word production: Evidence from aphasia and functional neuroimaging / Blumstein, Sheila E. -- Connectionist perspectives on lexical representation / Plaut, David C. -- Recognizing words from speech: The perception-action-memory loop / Poeppel, David / Idsardi, William -- Brain structures underlying lexical processing of speech: Evidence from brain imaging / Davis, Matthew H. / Rodd, Jennifer M. -- The neuronal infrastructure for unification at multiple levels / Hagoort, Peter -- Subject index -- Colour plates

Sommario/riassunto   This book includes the work of experts from a wide range of backgrounds who share the desire to understand how the human brain represents words. The focus of the volume is on the nature and structure of word forms and morphemes, the processes operating on the speech input to gain access to lexical representations, the modeling and acquisition of these processes, and on the neural underpinnings of lexical representation and process.
