Sommario/riassunto	Sub-Saharan Africa needs much faster economic growth and more effective economic, financial, and social policies if it is to make up for lost ground and reduce the number of people living in abject poverty. Edited by Laura Wallace, this volume presents the proceedings of a May 1998 seminar in Paris, organized jointly by the IMF and the Japanese Ministry of Finance, on ways to accelerate Africa's growth in our increasingly globalized world. Senior African and Asian government officials, representatives from multicultural institutions, donors, academics, and private sector participants gathered to discuss how to

improve the private investment environment in African countries and take advantage of globalization's benefits while minimizing its risks, and how to strengthen the contribution of government in areas of capacity building, good governance, effective public resource management, and improved quality and composition of government spending.

Nota di contenuto	1. RFID basics -- 2. RFID technology essentials -- 3. Uses of RFID technology -- 4. RFID is not a solution waiting for a problem -- 5. RFID and the Internet of things -- 6. Implementing RFID -- 7. Business cases for RFID -- 8. Conclusions -- Appendix -- Notes -- References -- Index.
Sommario/riassunto	The quality and effectiveness of decisions made within an organization and its supply chain depend on the accuracy and timeliness of the information on which they are based. Radio frequency identification (RFID) is a technology that can provide more accurate information in near real time and thus increase the quality and timeliness of decisions based on that information. RFID systems are currently in use in areas such as inventory management, process control, asset tracking and monitoring, and retail point of sale. Organizations that appropriately incorporate RFID into their operations and information management

systems have increased their agility, effectiveness, and efficiency,  
resulting in organizational growth and increased profitability.
